CAREER PROFILE

Highly motivated Information Systems student with a certified expertise in **Data Analytics** and a strong foundation in **Backend Development**. Proficient in the end-to-end data lifecycle, including building automated data pipelines, executing advanced data cleansing, and designing relational databases. Experienced in leveraging **SQL (BigQuery)**, **Python**, **advanced Excel**, and **Google Looker Studio** to transform complex, unstructured datasets into interactive dashboards and actionable business insights. Possesses proven leadership and cross-functional communication skills from managing large-scale student organization projects.

EDUCATION

Bachelor of Information System : President University, GPA : 3.69 2024 - Expected 2027

PROFESSIONAL SKILLS

- Data Analytics & Visualization: Advanced Excel (VLOOKUP, Pivot Tables), Data Cleansing, Google Looker Studio, Dashboard Management.
- Programming & Databases: SQL (Google BigQuery), Python (Google Colab), Streamlit, PHP, MySQL, Relational Database Design (ERD).
- Systems & Architecture: Backend Logic Design, System Integration, CRUD Optimization, Data Pipeline Structuring.
- Core Competencies: Cross-functional Team Collaboration, Project Timeline Management, Strategic Communication.

RELEVANT PROJECTS

AI Open Innovation Challenge: Cikarang Dry Port (Data & Backend Analyst) Jun 2026 – Jul 2026

- Automated data ingestion pipelines to extract, clean, and structure raw unstructured OCR data for seamless Customs Declarations.
- Developed a sandbox API simulator to validate data integrity, identify logging anomalies, and ensure zero-error responses.
- Designed relational database schemas and metric log tracking **systems** to monitor data pipeline health and optimize dashboard reporting.

MAVEBID Auction Platform (Database & Reporting Analyst) Jan 2025 – Mar 2025

- Designed efficient relational database structures (MySQL) to manage high-volume auction listings and user transaction logs.
- Implemented structured CRUD functionalities to secure data manipulation and maintain transactional data integrity.
- Engineered automated reporting features to query and synthesize historical auction data for user transaction insights.

DVD Rental Management System (Data Analyst & Developer) Feb 2026 – Apr 2026

- Developed an interactive web-based data dashboard using Python and Streamlit to visualize movie rental operations.
- Optimized relational database tables in MySQL to improve data retrieval speed and query organization efficiency.
- Cleaned and integrated complex transaction datasets to support accurate multi-table data aggregation and business reporting.

CERTIFICATION

Data Analyst Bootcamp | Karirnex Jul 2026 – Jul 2026

- Completed 20 hours of training in Data Cleansing, SQL (Google BigQuery), Python (Google Colab), and Google Looker Studio dashboards.
- Developed an end-to-end data analytics dashboard as part of the hands-on 5-hour Mini Project graduation program.

Microsoft Excel Bootcamp | Karirnex Jun 2026 – Jun 2026

- Mastered advanced spreadsheet formulas (IF, VLOOKUP/HLOOKUP, COUNTIF) and dynamic Pivot Tables for business reporting solutions.
- Designed dynamic Pivot Tables and data models to synthesize large-scale datasets into clear, actionable executive summaries.

VOLUNTEER EXPERIENCE

Vice Project Manager | PURD Goes to School Nov 2025 - Jan 2026

- Supervised end-to-end event planning, directed committee logistics, and successfully secured project execution matching the schedule.
- Coordinated cross-functional teams and optimized resource allocation through structured spreadsheet tracking.
- Managed registration data and structured communication flows for 100+ participants, resulting in zero major event execution delays.

PIC Event Organizer | PURD FAREWELL & EXHIBITION Feb 2026 – Apr 2026

- Led end-to-end event preparation and execution, managing scheduling timelines and committee deliverables
- Analyzed and monitored budget allocation to ensure optimal logistics distribution without overspending.
- Facilitated clear communication **channels** between internal committees and external vendors to maintain operational efficiency.
